MARINE HARDWARE & TECHNICAL SUPPLIES

MARINE HARDWARE & TECHNICAL EXCELLENCE

Complete Solutions Under One Roof From engine room essentials to deck fittings, we provide a comprehensive range of technical equipment for all vessel types. At ASF, we ensure your fleet operates with maximum safety and efficiency.

OUR COMMITMENT:

CERTIFIED QUALITY

Durable, IMO-compliant, and industry-tested products.

HIGH AVAILABILITY

Extensive stock for new builds or urgent spare parts.

RAPID DELIVERY

Fast logistics to minimize downtime and keep you sailing.

ASF SHIP TECHNICAL SUPPLY

Ship Provisions & Food Supply

OUR PRODUCT RANGE:

FRESH & FROZEN

Fruits, vegetables, dairy, and premium meat products.

DRY GOODS & BEVERAGES

Essential grains, canned goods, and bottled water.

SPECIALIZED DIETS

Halal, vegetarian, and custom dietary solutions.

HYGIENE ESSENTIALS

Professional cleaning and sanitation products.

FRESHNESS GUARANTEED

All supplies are stored under controlled conditions and handled according to international hygiene standards (HACCP compliant).

**RELIABLE PROVISIONING –
FRESHLY DELIVERED TO YOUR ANCHOR.**

ASF SHIP TECHNICAL SUPPLY

MARINE MOORING SYSTEM

COMPLETE MOORING SOLUTIONS

High quality and durable mooring equipment designed for safe and reliable operations in all marine conditions.

FAIRLEADS

Guides mooring lines smoothly and reduces friction and wear.

BOW CHOCKS

Protects the hull and helps to lead mooring lines in the right direction.

TYPE A CHOCKS

Strong and reliable design for various mooring applications.

MOORING PANS

Used for securing mooring lines safely on deck.

DOUBLE BITTS

Ensures secure fastening of mooring lines with high holding capacity.

DOUBLE BOLLARDS

Robust construction for heavy duty mooring operations.

PREMIUM QUALITY

Built to last in demanding conditions.

HIGH STRENGTH

Designed for maximum strength and durability.

CORROSION RESISTANT

Long lasting protection in marine environment.

RELIABLE PERFORMANCE

Tested and trusted for safe operations.

ASF SHIP TECHNICAL SUPPLY

MARINE FAIRLEAD / GUIS CABLES Y ESPIAS - ROLLERS

RELIABLE SOLUTIONS FOR SAFE MOORING OPERATIONS

High quality fairleads, rollers and mooring equipment designed to ensure smooth operation, reduce friction and enhance the safety of your vessel.

FAIRLEADS

Smooth and durable design to guide mooring lines and reduce wear.

GUIS CABLES

Protects mooring lines from chafing and ensures safe operations.

ROLLERS

Facilitates smooth line movement and minimizes friction.

3-ROLLER FAIRLEAD

Designed for heavy duty applications and efficient line management.

HEAVY DUTY ROLLERS

Built for high strength and long lasting performance.

DOUBLE ROLLER

Ensures safe mooring with stable and reliable performance.

PREMIUM QUALITY

Manufactured from high grade materials for maximum durability.

HIGH STRENGTH

Designed to withstand heavy loads and harsh marine conditions.

CORROSION RESISTANT

Coated and treated for excellent resistance in marine environment.

RELIABLE PERFORMANCE

Tested and trusted for safe and efficient mooring operations.

ASF SHIP TECHNICAL SUPPLY

CHAIN STOPPER - FRENOS CADENA

RELIABLE HOLDING. MAXIMUM SAFETY.

High quality chain stopper and accessories designed to secure anchor chains effectively and ensure safe anchoring operations in all marine conditions.

CHAIN STOPPER

Secures the anchor chain and prevents movement during anchoring.

BRAKE UNIT

Reliable braking system for controlled holding and safe operation.

PELICAN HOOK

Strong and durable hook for connecting chain and accessories.

KENTER SHACKLE

Used for connecting chain components and ensuring secure assembly.

CHAIN STOPPER IN USE

Ensures smooth and safe anchoring by holding the chain firmly in place.

TURNBUCKLE & FITTINGS

Adjustable fittings for chain tensioning and secure mooring connections.

PREMIUM QUALITY

Manufactured from high grade materials for long lasting performance.

HIGH STRENGTH

Built to withstand heavy loads and harsh marine environments.

CORROSION RESISTANT

Coated and treated for excellent corrosion resistance.

SAFE & RELIABLE

Designed to ensure maximum safety and operational efficiency.

ASF SHIP TECHNICAL SUPPLY

CHAIN STOPPER - FRENOS CADENA

RELIABLE HOLDING. MAXIMUM SAFETY.

High quality chain stopper and mooring equipment designed to secure anchor chains effectively and ensure safe anchoring operations in all marine conditions.

DOUBLE BOLLARD

Designed for securing mooring lines with high holding capacity.

T HEAD BOLLARD

Ideal for heavy duty mooring applications and chain management.

CROSS BOLLARD

Provides secure fastening and smooth operation for mooring lines.

MOORING BOLLARD

Robust construction for long lasting performance in marine environments.

CHAIN GUIDE

Ensures smooth movement of anchor chain and reduces wear and tear.

LOW PROFILE BOLLARD

Low profile design for maximum deck space and efficient operation.

Ensures secure anchoring operations for all types of vessels.

ASF SHIP TECHNICAL SUPPLY

ASF CAST FAIRLEAD (RAM'S HORN): 10 TON SWL DECK FITTING

High quality cast steel fairlead (ram's horn) for marine deck applications.

Designed to lead mooring lines safely and efficiently. Built to withstand heavy loads and harsh marine environments.

Deck Mounted

GENERAL INFORMATION

TYPE	ASF Cast Fairlead (Ram's Horn)
SAFE WORKING LOAD (SWL)	10 Ton
MATERIAL	Cast Steel (High Tensile)
FINISH	Galvanized / Painted
APPLICATION	Mooring Lines, Towing Lines, Anchoring Operations
DESIGN STANDARD	Based on ISO 13729, BS EN 15614-1 and Good Marine Practice
MANUFACTURER	ASF GEMİ MAKİNA
ORIGIN	TÜRKİYE

FEATURES

- ✓ Robust cast steel construction for maximum strength and durability
- ✓ Smooth horn profile to reduce line wear and chafing
- ✓ Corrosion resistant with galvanized or painted finish
- ✓ Designed for easy installation on deck
- ✓ Suitable for a wide range of mooring and towing applications
- ✓ Complies with IMO MSC.1/Circ.1448 and relevant class rules

APPLICATIONS

- Mooring Lines
- Towing Lines
- Offshore Platforms
- Deck Machinery
- General Marine Use

NOTES

- SWL (Safe Working Load) is based on direct pull.
- Not to be used for lifting applications.
- Regular inspection and maintenance is recommended.

DIMENSIONS (mm)

PRODUCT CODE	SWL (TON)	L	H	B	L1	L2	ØD (HORN)	Ød (BOLT HOLE)	WEIGHT (kg)
ASF-FR10	10	600	200	120	200	200	Ø55	Ø22	28.0

Note: Dimensions are approximate and may vary slightly with production tolerances.

TECHNICAL PROPERTIES

PROPERTY	VALUE
Material	Cast Steel (GS-C25 or Equivalent)
Surface Treatment	Hot Dip Galvanized (Min. 85 µm) or Epoxy Painted
Hardness	HB 150 - 220
Working Temperature	-20°C to +60°C
Proof Load	1.5 x SWL (15 Ton)
Breaking Load	≥ 3 x SWL (30 Ton)

INSTALLATION

- 1 Position the fairlead on the deck in the desired location.
- 2 Mark the bolt hole positions.
- 3 Drill holes to match the bolt diameter (Ød).
- 4 Apply approved marine sealant around the base.
- 5 Secure the fairlead using suitable bolts, washers and nuts. Tighten bolts evenly to recommended torque.

RECOMMENDED BOLTS & TORQUE

BOLT SIZE	QUALITY	QTY	RECOMMENDED TORQUE (Nm)
M20	8.8 / A2-70	2	180 - 200

TEST & CERTIFICATION

- ✓ Proof load tested to 1.5 x SWL.
- ✓ All units are inspected and quality controlled.
- ✓ Test certificate can be provided upon request.

SAFE WORKING LOAD INFORMATION

SWL is the maximum load that the fairlead is designed to withstand under normal service conditions.

ROPES - ESPIAS

QUALITY ROPES FOR MARINE APPLICATIONS

Our wide range of high performance ropes are designed to deliver strength, durability and reliability in all marine environments.

POLYPROPYLENE ROPE

Lightweight, floats on water and resistant to most chemicals and abrasion.

MANILA ROPE

Natural fiber rope with excellent strength, ideal for general marine use.

MARINE NYLON ATLAS ROPE

High strength and elasticity with excellent resistance to abrasion and UV exposure.

DOUBLE PLY ROPE

Durable and flexible construction for heavy duty applications.

6 STRAND POLYAMIDE ROPE

High tenacity and shock absorption, ideal for mooring and towing operations.

FILAMENT 6 PLY ROPE

Strong and abrasion resistant rope with excellent knot strength and durability.

HIGH STRENGTH

Engineered to withstand heavy loads and harsh marine conditions.

UV & CHEMICAL RESISTANCE

Resistant to UV rays and most chemicals for long lasting performance.

FLEXIBLE & DURABLE

Flexible construction ensures easy handling and long service life.

RELIABLE PERFORMANCE

Trusted by marine professionals worldwide.

ASF SHIP TECHNICAL SUPPLY

CHAIN CABLES - CADENAS

HIGH STRENGTH CHAIN CABLES FOR MARINE APPLICATIONS

Our chain cables are manufactured to international standards, offering high strength, durability and excellent resistance to wear and corrosion in all marine environments.

CHAIN CABLES - CADENAS

SWIVEL EYE & EYE

Allows chain to rotate freely and prevents twisting and kinking.

SWIVEL JAW & EYE

Flexible connection between chain and components.

SWIVEL ANCHOR

Strong and durable swivel used for anchor connections.

CONNECTING LINK

Used to connect two chain ends or connect accessories.

KENTER SHACKLE

Used to join chain and anchor securely in mooring systems.

KENTER SHACKLE (TYPE A)

Type A kenter shackle with standard dimensions.

CHAIN CONNECTOR

Strong connector used for joining chain sections.

JOINING SHACKLE

Joins two chain sections or accessories with high strength.

ANCHOR LINK

Connects anchor to chain or other components.

ENLARGED LINK

Provides easy connection for chain and fittings in heavy duty use.

SWIVEL JAW

Prevents chain twist and allows smooth movement.

D SHACKLE

Reliable and secure shackle for marine applications.

HIGH STRENGTH

Manufactured from high quality steel for maximum strength and durability.

CORROSION RESISTANT

Hot dip galvanized or coated to ensure excellent resistance to corrosion and harsh marine conditions.

RELIABLE PERFORMANCE

Designed to meet international standards and ensure safe and reliable mooring operations.

WIDE APPLICATION

Ideal for use in anchor systems, mooring systems and heavy duty marine applications.

ASF SHIP TECHNICAL SUPPLY

LIFTING HOOKS & RIGGING EQUIPMENT

HIGH STRENGTH HOOKS FOR MARINE & INDUSTRIAL APPLICATIONS

Our lifting hooks are manufactured from high quality alloy steel, heat treated and tested to ensure maximum strength, durability and safety in demanding marine and industrial environments.

EYE HOOK

For general lifting applications.

SWIVEL HOOK

360° rotation for flexible lifting.

SAFETY HOOK

Safety latch design for secure lifting.

CLEVIS HOOK

For use with chain or wire rope.

SELF LOCKING HOOK

Automatic locking for extra safety.

FOUNDRY HOOK

Wide throat opening for easy handling.

GRAB HOOK

Strong and durable for heavy loads.

SLING HOOK

Ideal for slings and webbings.

HIGH LOAD CAPACITY

Designed to handle heavy loads with maximum safety.

SAFETY LOCK

Equipped with safety latch to prevent accidental release.

DURABLE STEEL

Made from premium alloy steel, forged and heat treated.

CERTIFIED QUALITY

Manufactured and tested to meet international quality standards.

ASF SHIP TECHNICAL SUPPLY

LIFTING EQUIPMENT

HIGH PERFORMANCE LIFTING CLAMPS

Our lifting clamps are engineered for safe and efficient handling of heavy loads in marine, offshore and industrial applications.

**PDB HORIZONTAL
LIFTING CLAMP**

- ✓ For horizontal lifting and transport of steel plates.
- ✓ Large jaw opening for wide range of plate thickness.
- ✓ High strength alloy steel construction.
- ✓ Safe and reliable locking mechanism.

**QT OIL DRUM
CLAMP**

- ✓ Designed for vertical lifting of steel oil drums.
- ✓ Automatic locking mechanism for secure grip.
- ✓ Lightweight and easy to operate.
- ✓ Safe lifting of full or empty drums.

**CDH VERTICAL
LIFTING CLAMP**

- ✓ For vertical lifting and transport of steel plates.
- ✓ Compact and lightweight for easy handling.
- ✓ High safety factor and durable design.
- ✓ Locking device for extra safety.

HATCHES - ESCOTILLAS

BUILT FOR SAFETY. ENGINEERED TO LAST.

Our marine hatches are designed for weathertight and watertight performance, ensuring safety and durability in all marine conditions. Manufactured from high quality steel with corrosion resistant coating.

WATERTIGHT DESIGN

Ensures maximum protection against water ingress and harsh marine environments.

DURABLE CONSTRUCTION

Built from high quality steel with corrosion resistant coating for long service life.

EASY OPERATION & SAFETY

Ergonomic handwheel and locking system for safe and quick access.

CUSTOM SIZES AVAILABLE

Custom dimensions and type options available to meet project requirements.

SPECIFICATIONS

Material	Mild Steel / Stainless Steel
Coating	Primer + Marine Paint
Type	Weathertight / Watertight
Operation	Handwheel
Opening Angle	0° - 180°
Gasket	Rubber Seal
Standard	Comply with IMO & IACS Requirements

INSULATION

HIGH PERFORMANCE MARINE INSULATION SOLUTIONS

Our insulation materials are designed to provide excellent thermal efficiency, fire resistance, noise reduction and protection for marine and offshore applications.

CALCIUM SILICATE BOARD

High temperature resistant board with excellent fire performance and low thermal conductivity.

ROCK WOOL BOARD

Excellent thermal and acoustic insulation. Fire resistant and suitable for various applications.

GLASS WOOL ROLL

Flexible and lightweight insulation roll. Provides excellent thermal and acoustic performance.

INSULATION BLANKET

Removable and reusable blanket for piping, equipment and complex shapes.

CERAMIC FIBER BLANKET

High temperature insulation blanket. Excellent thermal stability and low heat storage.

KEY BENEFITS

THERMAL EFFICIENCY

Reduces heat transfer and improves energy efficiency.

FIRE RESISTANCE

Non-combustible materials ensure maximum fire safety.

NOISE REDUCTION

Helps to reduce noise and vibration levels.

MOISTURE RESISTANT

Resistant to moisture, water and harsh marine conditions.

DURABLE & RELIABLE

Long lasting performance in demanding environments.

High buoyancy life jacket with whistle, light, lifting loop and reflective tapes for maximum safety.

LIFE VEST

Lightweight and comfortable life vest. Designed for freedom of movement and high visibility.

IMMERSION SUIT

Thermal protection suit provides survival in cold water conditions. Keeps body warm and safe.

SURVIVAL SUIT

Made from high quality materials. Provides protection in extreme marine conditions.

WORK SUIT

Durable work suit for marine and industrial applications. Water resistant and strong.

LIFE BUOY LIGHT

Self-igniting lifebuoy light with high visibility. Ensures quick location in the dark.

LIFE JACKET (SOLAS)

SOLAS approved life jacket with high buoyancy for passenger and crew safety.

LIFE VEST (SOLAS)

SOLAS approved life vest with high buoyancy and whistle for emergency situations.

LIFE BUOY

SOLAS approved lifebuoy with retro reflective tapes and floating rope.

SMOKE SIGNAL

Buoyant smoke signal for distress situations. High visibility smoke.

FLOATING LIGHT

Automatic floating light for life jackets. Activates on water contact.

KEY FEATURES

SOLAS COMPLIANT

All products meet SOLAS & IMO requirements.

HIGH SAFETY STANDARDS

Manufactured to international marine safety standards.

DURABLE & RELIABLE

Built for harsh marine environments and long-term use.

EASY TO USE

Designed for quick and effective use in emergencies.

COMPACT STORAGE

Easy to store and maintain on board all types of vessels.

HOSES MANGUERAS - FIRE EXTINGUISHER

FIRE HOSES

RUBBER FIRE HOSE

High quality rubber fire hose with excellent flexibility and abrasion resistance. Suitable for marine and industrial use.

FIRE HOSE REEL

Manual fire hose reel for wall or deck mounting. Sturdy construction and easy to operate.

PU LAYFLAT HOSE

Lightweight PU layflat hose with high tensile strength. Resistant to aging, ozone and chemicals.

PVC FIRE HOSE

PVC fire hose with polyester yarn reinforcement. Lightweight, kink resistant and easy to handle.

FIRE EXTINGUISHERS

DRY POWDER EXTINGUISHERS

Effective on Class A, B and C fires. Available in various capacities. Reliable performance and easy maintenance.

WHEELED POWDER EXTINGUISHER

Large capacity wheeled type. Ideal for industrial areas, ports and ship decks.

CO₂ FIRE EXTINGUISHER

Effective on electrical and liquid fires. Clean agent leaves no residue.

DRY POWDER EXTINGUISHER

High efficiency powder extinguisher for multiple fire classes.

FOAM EXTINGUISHER

Ideal for Class A and B fires. Excellent for use on liquids and solids.

CO₂ EXTINGUISHER

Carbon dioxide extinguisher for electrical and flammable liquid fires.

KEY FEATURES

HIGH SAFETY STANDARDS

All products comply with international marine safety standards.

DURABLE & RELIABLE

Manufactured from high quality materials for long service life in harsh conditions.

EASY TO USE

Designed for quick deployment and effective fire protection.

MARINE APPROVED

Suitable for all types of vessels and offshore installations.

LOW MAINTENANCE

Easy inspection, service and maintenance.

TECHNICAL SPECIFICATIONS

PRODUCT	STANDARD	WORKING PRESSURE	SIZE / CAPACITY	APPLICATION
Rubber Fire Hose	SOLAS / MED	16 bar	1½" - 2¼"	General Fire Fighting
PU Layflat Hose	SOLAS / MED	10 bar	1½" - 4"	Fire & Deck Washing
PVC Fire Hose	SOLAS / MED	13 bar	1½" - 3"	Marine & Industrial Use
Dry Powder Ext.	EN3 / SOLAS	15 - 17 bar	1 - 12 kg	A, B, C Fires
CO ₂ Extinguisher	EN3 / SOLAS	50 - 60 bar	2 - 9 kg	B, C & Electrical Fires
Foam Extinguisher	EN3 / SOLAS	15 - 17 bar	6 - 9 L	A, B Fires

LIFTING EQUIPMENT

High-performance lifting equipment designed for safe and efficient handling of heavy loads in marine, offshore, and industrial applications. Built for durability, strength and maximum safety.

ELECTRIC CHAIN HOIST

High-performance electric chain hoist designed for heavy-duty operations with precise control and high safety standards.

MULTI-LEG CHAIN SLING

Engineered for balanced lifting of heavy loads with multiple connection points for stability and strength.

HOOK TYPE CHAIN SLING

Durable lifting solution equipped with safety hooks for secure and efficient load handling.

LIFTING ACCESSORIES

HOOKS

High-strength forged hooks designed for safe and reliable lifting operations.

SHACKLES

Heavy-duty shackles providing secure connections for lifting and rigging applications.

SWIVELS

Rotating connectors preventing twisting and improving operational safety.

KEY FEATURES

HIGH LOAD CAPACITY

Designed to handle heavy loads with maximum safety.

CERTIFIED LIFTING EQUIPMENT

Complies with international safety standards.

WEAR & CORROSION RESISTANT

Built for long-lasting performance in harsh environments.

MARINE GRADE MATERIALS

High quality materials suitable for marine and offshore use.

SAFE LOCKING MECHANISMS

Equipped with safety locks for secure operations.

TECHNICAL SPECIFICATIONS

PRODUCT	CAPACITY	MATERIAL	STANDARD	APPLICATION
 ELECTRIC CHAIN HOIST	1 - 10 TON	ALLOY STEEL	ISO / CE	LIFTING
 CHAIN SLING (MULTI-LEG)	1 - 20 TON	ALLOY STEEL	EN 818-4	RIGGING

CHAIN BLOCK

High quality chain blocks designed for safe and efficient lifting operations.
Robust construction, reliable performance and easy to use in marine,
industrial and offshore environments.

LEVER CHAIN BLOCK

Compact and lightweight design
with lever operation for easy
and efficient lifting and pulling.
Suitable for various industrial
applications.

MANUAL CHAIN BLOCK

Durable and reliable manual
chain block for safe lifting.
Strong steel construction
ensures long life and high
performance.

ELECTRIC CHAIN BLOCK

Heavy duty electric chain block
for high capacity lifting.
Smooth operation, low
maintenance and high safety
standards.

DOUBLE CHAIN BLOCK

Double chain system for
enhanced safety and stability.
Ideal for heavy loads and
demanding working
conditions.

KEY FEATURES

HIGH STRENGTH

Manufactured from high grade
steel for maximum strength
and durability.

SAFE & RELIABLE

Designed with safety mechanisms
to ensure secure and stable
lifting operations.

EASY OPERATION

Smooth and efficient operation
for reduced effort and
increased productivity.

QUALITY ASSURED

Complies with international
standards and tested for
maximum performance.

LOW MAINTENANCE

Robust design for long service
life and minimal maintenance
requirements.

TECHNICAL SPECIFICATIONS

TYPE	CAPACITY (TON)	LIFT HEIGHT (m)	CHAIN FALLS	LOAD CHAIN DIAMETER (mm)	APPLICATION

LIFTING ACCESSORIES

High-quality lifting accessories designed for safe, secure and efficient operations.

Manufactured from premium materials to ensure durability, strength and

long service life in marine and industrial environments.

EYE BOLT / EYE NUT

Forged eye bolts and nuts used for lifting applications. High strength and corrosion resistance.

MASTER LINK

High strength master links for connecting chain slings and lifting assemblies. Reliable and durable.

LIFTING EYE NUT

Designed for safe lifting operations. Manufactured from high-grade steel.

PAD EYE

Heavy duty pad eyes for securing and lifting. Suitable for marine and industrial use.

WELD-ON D RING

Weld-on lifting point for secure attachment. High load capacity and long-lasting performance.

SUB ASSEMBLY LINK

Connects master link to sling legs. Ensures balance and stability in lifting operations.

TRIANGULAR RING

Triangular ring for lifting and tensioning applications. Strong and reliable construction.

BOW SHACKLE

Strong bow shackle with safety pin. Ideal for lifting and rigging applications.

D SHACKLE

Heavy duty D shackle designed for secure connections and high load applications.

KEY FEATURES

HIGH STRENGTH

Manufactured from premium steel for maximum strength and durability.

SAFE & RELIABLE

Engineered for safe lifting operations with secure and stable performance.

CORROSION RESISTANT

Surface treated for excellent corrosion resistance in marine environments.

QUALITY ASSURED

Complies with international standards and tested for maximum performance.

WIDE APPLICATION

Suitable for a wide range of marine, offshore and industrial lifting applications.

HYDRANTS - VALVULAS PARA GRIFOS

High quality hydrants (valves for taps) designed for marine and industrial applications. Built for durability, corrosion resistance and reliable performance in demanding environments.

**STRAIGHT PATTERN
HYDRANT**

Straight pattern hydrant for general purpose applications. Durable and corrosion resistant design.

**ANGLE PATTERN
HYDRANT**

Angle pattern hydrant with angled outlet for improved flow and easy installation.

**90° ANGLE PATTERN
HYDRANT**

90 degree angle pattern hydrant for efficient water flow and space saving installation.

**FLANGE TYPE
HYDRANT**

Flange type hydrant for secure mounting and enhanced stability. Ideal for deck installations.

KEY FEATURES

CORROSION RESISTANT
Manufactured from high quality materials for long service life.

HIGH DURABILITY
Robust construction ensures reliable performance in harsh environments.

EASY OPERATION
Smooth operation with precise valve control.

SECURE & RELIABLE
Designed to prevent leakage and ensure safe operation.

WIDE APPLICATION
Suitable for marine, industrial and offshore applications.

TECHNICAL SPECIFICATIONS

TYPE	MATERIAL	INLET	OUTLET	WORKING PRESSURE	STANDARD	APPLICATION
 STRAIGHT PATTERN HYDRANT	BRASS	BSP / NPT 1½"	BSP 2½"	16 BAR	DIN 14461	General Water Supply

VALVES - VALVULAS

High quality valves designed for marine and industrial applications.

Reliable performance, durable construction and easy operation in demanding environments.

GATE VALVE

Reliable shut-off valve for various industrial applications. Strong and durable design.

GLOBE VALVE

Used for regulating flow and pressure. Provides accurate flow control.

CHECK VALVE

Prevents backflow in piping systems. Automatic operation ensures safety.

KNIFE GATE VALVE

Suitable for slurry and viscous fluids. Ensures smooth and reliable operation.

ANGLE VALVE

Designed for angular flow control. Ideal for marine and industrial applications.

CAST IRON VALVE

Cost-effective solution for general service. Excellent strength and performance.

STAINLESS STEEL VALVE

Corrosion resistant valve for marine and chemical applications. Long service life.

DIAPHRAGM VALVE

Ideal for corrosive and abrasive fluids. Provides tight shut-off and durability.

PRESSURE RELIEF VALVE

Protects systems from overpressure. Ensures safety and prevents equipment damage.

BRONZE VALVE

High corrosion resistance and reliability. Perfect for marine and seawater services.

KEY FEATURES

HIGH DURABILITY

Manufactured from high quality materials for long service life.

CORROSION RESISTANT

Suitable for marine, industrial and corrosive environments.

RELIABLE PERFORMANCE

Designed for stable operation under high pressure and temperature conditions.

EASY MAINTENANCE

Simple design for easy installation and maintenance.

QUALITY ASSURED

Tested and certified to meet international standards.

VALVULAS BUTTERFLY

High quality butterfly valves designed for marine and industrial applications.
Reliable sealing, lightweight design, easy operation and long service life
in demanding environments.

WAFER BUTTERFLY VALVE

Compact wafer design for easy installation between flanges. Suitable for general purpose applications.

LUG BUTTERFLY VALVE

Lug type design for end of line service. Provides excellent sealing and high pressure resistance.

GEAR OPERATED BUTTERFLY VALVE

Gear operated for easy and precise control. Ideal for large size and high pressure applications.

FLANGED BUTTERFLY VALVE

Flanged connection ensures strong and leak-proof performance. Suitable for various industrial systems.

HIGH PERFORMANCE BUTTERFLY VALVE

High performance design with lever operation. Provides tight shut-off and reliable performance.

PNEUMATIC ACTUATED BUTTERFLY VALVE

Pneumatic actuator for automatic operation. Ensures reliability and efficiency in control systems.

TRIPLE OFFSET BUTTERFLY VALVE

Triple offset design ensures zero leakage and longer service life. Ideal for high temperature service.

RESILIENT SEATED BUTTERFLY VALVE

Resilient seat provides tight sealing and corrosion resistance. Suitable for water and chemical applications.

DOUBLE ECCENTRIC BUTTERFLY VALVE

Double eccentric design reduces wear and ensures superior sealing performance. Ideal for heavy duty use.

KEY FEATURES

- HIGH DURABILITY**
Manufactured from high quality materials for long service life.
- EXCELLENT SEALING**
Tight shut-off and low leakage design.
- EASY OPERATION**
Lightweight and easy to operate.
- CORROSION RESISTANT**
Suitable for marine, industrial and corrosive environments.
- QUALITY ASSURED**
Tested and certified to meet international standards.

NOZZLE - TOBERAS

High performance nozzles designed for marine, industrial and fire fighting applications.
Precision engineered for efficient flow, durability and long service life.

JET NOZZLE

Adjustable jet nozzle for direct and powerful water stream. Suitable for fire fighting and industrial applications.

STRAIGHT NOZZLE

Provides a solid straight stream with excellent reach and impact. Ideal for general purpose use.

MULTI PURPOSE NOZZLE

Versatile nozzle with wide spray pattern control for various operational requirements.

BRANCH PIPE NOZZLE

Lightweight and durable branch pipe nozzle for quick operation and efficient flow control.

FOG NOZZLE

Delivers fine water fog for effective fire suppression and cooling. Ideal for marine and industrial use.

KEY FEATURES

HIGH DURABILITY

Manufactured from high quality brass and bronze materials for long service life.

CORROSION RESISTANT

Excellent resistance to corrosion and harsh marine environments.

EASY OPERATION

Ergonomic design for smooth and efficient operation.

LEAK PROOF

Precision sealing ensures leak proof performance under high pressure.

QUALITY ASSURED

Tested and certified to meet international standards.

TECHNICAL SPECIFICATIONS

FANS

High performance marine and industrial fans designed for efficient ventilation, durability and reliable operation in demanding environments.
Suitable for all types of ships, offshore and industrial applications.

AXIAL FAN

Axial flow fan designed for high airflow and low noise operation. Ideal for general ventilation and air circulation applications.

TUBULAR FAN

Tubular type fan with compact construction for efficient air movement in confined spaces. Suitable for ship and industrial use.

DUCT FAN

Duct mounting fan with strong performance and durability. Suitable for exhaust, supply and general ventilation systems.

KEY FEATURES

HIGH EFFICIENCY

Designed for maximum airflow with minimum energy consumption.

CORROSION RESISTANT

Manufactured from marine grade materials for long service life in harsh environments.

DURABLE CONSTRUCTION

Heavy duty construction ensures reliability and minimum maintenance.

LOW NOISE OPERATION

Optimized blade design reduces noise and vibration levels.

WIDE APPLICATION

Suitable for marine, offshore and industrial ventilation requirements.

TECHNICAL SPECIFICATIONS

TYPE	AIRFLOW (m ³ /h)	DIAMETER (mm)	STATIC PRESSURE (Pa)	POWER (kW)	SPEED (RPM)	VOLTAGE (V)	APPLICATION

ELECTRICAL

High quality electrical cables and wires designed for marine and industrial applications.
Reliable performance, fire resistance, durability and safety in demanding environments.

SICT FIRE RESISTANT SHIPBOARD INSTRUMENTATION CABLE

Fire resistant instrumentation cable for shipboard systems. Excellent performance and safety.

TXXI (IEC) LIGHT WEIGHT SHIPBOARD COMMUNICATION CABLE

Light weight communication cable with high flexibility and reliable signal transmission.

SXXI FIRE RESISTANCE SHIPBOARD POWER AND CONTROL CABLE

Fire resistant power and control cable for critical shipboard installations.

FA-TPYCY SHIPBOARD POWER AND LIGHTING CABLE 0.6/1KV

Power and lighting cable with overall screening for enhanced protection 0.6/1kV.

FA-DPYC SHIPBOARD POWER CABLE 0.6/1KV

Double layer screened power cable for shipboard power distribution 0.6/1kV.

FGCG CARGO SHIP MARINE POWER CABLE 0.6/1KV

Power cable for cargo ship applications. Durable and reliable under harsh marine conditions.

SHIPBOARD WIRE

Flexible shipboard wire for internal wiring applications. High conductivity and safety.

JIS C3410 COMMON SCREENED SHIPBOARD TELEPHONE CABLE

Common screened telephone cable for ship communication systems.

MARINE FIBER OPTIC CABLE

High performance fiber optic cable for marine communication and data transmission.

FIRE-RETARDANT SCREENED MARINE COMMUNICATION CABLES 250V

Fire-retardant screened communication cable for marine applications 250V.

KEY FEATURES

FIRE RESISTANT

Designed to maintain circuit integrity in fire conditions.

HIGH RELIABILITY

Ensures stable performance and long service life.

MARINE GRADE MATERIALS

Resistant to salt water, oil, chemicals and UV.

EXCELLENT CONDUCTIVITY

High conductivity copper conductor for efficient power transmission.

WIDE APPLICATION

Suitable for all types of ships, offshore and industrial use.

NAVIGATION LIGHTS

High quality navigation lights designed for marine and offshore applications.

Reliable performance, excellent visibility and long service life in all weather conditions.

ANCHOR LIGHT

360° white light
for anchoring and
mooring operations.

MASTHEAD LIGHT

225° white light visible
from the front of the
vessel.

SIDE LIGHTS

112.5° green (starboard)
and red (port) lights.
Compliant with COLREGs.

ALL-ROUND LIGHTS

360° visibility.
Suitable for vessels
underway.

HORIZON LIGHTS

Long range visibility
with low power
consumption.

DECK LIGHT

360° white light
for deck and working
areas.

STERN LIGHT

135° white light visible
from the stern.

BI-COLOR LIGHTS

Combination of port
(red) and starboard
(green) in one unit.

TRICOLOR LIGHT

Red, green and white
in one unit for power
driven vessels.

SOLAR NAV. LIGHT

Solar powered LED
navigation light with
high efficiency.

LED NAV. LIGHT

Energy efficient LED
light with long life
and high visibility.

KEY FEATURES

HIGH VISIBILITY

High intensity LEDs and
optical design ensure
excellent visibility.

DURABLE CONSTRUCTION

Corrosion resistant materials
and waterproof design for
harsh marine environments.

WEATHER PROOF

IP66/IP67 rated for reliable
performance in all weather
conditions.

EASY INSTALLATION

Compact design and multiple
mounting options for quick
and easy installation.

COMPLIANCE

All lights comply with
COLREGs and international
marine standards.

LASHING

High quality lashing and securing components for safe and reliable cargo securing in containers, on deck and in holds. Manufactured to international standards for marine and industrial applications.

**RAISED CLOVERLEAF
LASHING POT**

Used with lashing bars to secure containers and cargo on deck or in holds.

**DOUBLE FLUSH ISO
FOUNDATION**

Provides secure seating for twistlocks. Complies with ISO standards.

**CONTAINER CORNER
FITTING**

Used at container corners for lifting, securing and lashing operations.

**CONTAINER FORGED
STEEL LASHING EYE**

High strength eye for lashing and securing cargo. Forged steel for durability.

**CONTAINER FLUSH ISO
FOUNDATION**

Flush type ISO foundation for twistlock engagement. Strong and durable.

**CONTAINER RAISED ISO
FOUNDATION**

Raised type foundation for improved twistlock engagement.

FLUSH LASHING POT

Flush mounted lashing pot for safe and effective cargo securing.

CONTAINER LASHING POT

Used with lashing bars and rods for securing containers and cargo.

LASHING BAR (TWISTLOCK BAR)

Used with lashing pots for securing containers and heavy cargo.

KEY FEATURES

HIGH STRENGTH

Manufactured from high grade steel for maximum strength and durability.

CORROSION RESISTANT

Surface treated or hot dip galvanized for superior corrosion resistance.

STANDARD COMPLIANT

Complies with ISO standards and major classification society requirements.

SECURE CARGO

Designed for safe and reliable lashing and securing of cargo.

WIDE APPLICATION

Suitable for containers, ships, offshore and industrial use.

LASHING

High quality lashing equipment designed for safe and secure cargo handling, transportation and securing. Manufactured to meet international standards for marine and industrial applications.

WEBBING SLING

High strength polyester webbing sling. Lightweight, flexible and durable. Color coded for easy identification. Various capacities and lengths available.

SOFT LASHING

Flexible and abrasion resistant soft lashing for securing delicate and irregular shaped cargo. Easy to handle and reusable.

RATCHET LASHING STRAP

Heavy duty ratchet lashing strap with double J-hooks. High strength, easy tensioning and reliable locking mechanism for maximum safety.

TURNBUCKLE

Malleable forged turnbuckle for tensioning and adjusting lashing systems. Available in hook & hook, eye & eye and hook & eye types.

LOAD BINDER

Ratchet type load binder for securing chains and cargo. Provides safe and effective tensioning. Forged steel construction.

ROUND SLING

Endless round sling for lifting and lashing. High strength with maximum load capacity and minimum elongation.

LASHING BELT / WEBBING

Polyester lashing belt / webbing for general lashing and securing applications. Available in different widths, strengths and colors.

CAM BUCKLE STRAP

Cam buckle strap with strong hooks for light to medium duty lashing. Easy to use and cost effective solution.

WIRE ROPE LASHING

Steel wire rope lashing with thimble eyes and fittings. High strength and durability for heavy duty applications.

KEY FEATURES

 **HIGH STRENGTH**
Made from premium materials for maximum strength and reliability.

 **DURABLE & RELIABLE**
Designed to withstand harsh marine environments and heavy use.

 **SAFE & SECURE**
Ensures safe lashing and securing of cargo during transportation.

 **EASY TO USE**
User friendly design for quick installation and operation.

 **STANDARD COMPLIANT**
Manufactured to comply with international marine and industrial standards.

INDUSTRIAL USE

ASF SHIP TECHNICAL SUPPLY

BEARINGS

High quality bearings for marine and industrial applications. Engineered for reliability, durability and long service life in demanding environments.

Supplied to meet international standards and OEM specifications.

DEEP GROOVE BALL BEARING

Suitable for high speed and radial loads. Widely used in motors, pumps and general machinery.

CYLINDRICAL ROLLER BEARING

High radial load capacity. Ideal for heavy duty applications.

TAPERED ROLLER BEARING

Handles combined radial and axial loads. Used in gearboxes, wheels and marine equipment.

SPHERICAL ROLLER BEARING

Self-aligning capability. Compensates for shaft misalignment and reduces stress on equipment.

THRUST BALL BEARING

Designed to support axial loads in one direction. Used in marine gearboxes, steering systems and winches.

NEEDLE ROLLER BEARING

Compact design with high radial load capacity. Used in confined spaces and high speed applications.

ANGULAR CONTACT BEARING

Supports combined radial and axial loads. Suitable for high speed and precision applications.

THRUST ROLLER BEARING

Withstands heavy axial loads. Used in vertical shafts and marine propulsion systems.

SPHERICAL PLAIN BEARING

Allows angular movement and misalignment. Used in steering gear, linkages and cylinders.

MARINE BEARING UNIT

Pre-assembled bearing units with housing. Easy installation and reliable performance in marine environments.

KEY FEATURES

HIGH RELIABILITY

Manufactured from premium materials for long service life and dependable performance.

HIGH LOAD CAPACITY

Engineered to withstand high radial and axial loads in marine applications.

CORROSION RESISTANT

Surface treated and sealed bearings for protection against salt water and harsh environments.

HIGH TEMPERATURE RESISTANT

Suitable for high temperature operations and continuous duty applications.

STANDARD COMPLIANT

Complies with ISO, DIN, JIS and other international standards.

BRAKE TEST KIT

Professional hydraulic brake test kit for measuring brake performance on marine winches, windlasses and deck machinery.

ASF GEMİ MAKİNA

www.asfgemimakina.com
info@asfgemimakina.com

TYPE	ASF700
DATE	NOVEMBER 2025
SERIAL NUMBER	K0001

DESCRIPTION

Hydraulic brake test kit is designed to accurately measure the braking force and efficiency of marine machinery brakes in accordance with IMO and class requirements.

The kit is suitable for winches, windlasses, capstans, cranes and other deck equipment.

FEATURES

- ✓ Hydraulic operation for accurate and safe testing
- ✓ High precision pressure gauge
- ✓ Robust and compact design
- ✓ Easy to operate and transport
- ✓ Supplied in a durable carrying case
- ✓ Calibration certificate included
- ✓ Complies with IMO MSC.1/Circ.1448 and relevant class rules

KIT COMPONENTS

 HYDRAULIC JACK (PB/PR)	 HYDRAULIC HAND PUMP	 LOAD MEASURING ARM ASSEMBLY
 PRESSURE GAUGE (0 - 1000 BAR)	 ROPE / WIRE ROPE SHEAVE	 CARRYING CASE

SPECIFICATIONS

MODEL	ASF700
MAX TEST LOAD	700 Ton
MAX PRESSURE	1000 Bar
HYDRAULIC JACK CAPACITY	50 / 100 / 200 / 300 Ton (Interchangeable)
PRESSURE GAUGE RANGE	0 - 1000 Bar
ACCURACY	± 1.0% FS
OPERATING TEMPERATURE	-20°C to +60°C
TESTING STANDARD	IMO MSC.1/Circ.1448
MATERIAL	High Strength Steel
FINISH	Epoxy Painted
WEIGHT (COMPLETE KIT)	Approx. 45 kg
DIMENSIONS (CASE)	1200 x 400 x 260 mm

APPLICATION

- Winches
- Windlasses
- Capstans
- Cranes
- Other Deck Machinery

HOW IT WORKS

- 1 Install the rope / wire on the sheave and around the brake drum.
- 2 Connect the load measuring arm to the hydraulic jack.
- 3 Apply hydraulic pressure to the brake.
- 4 Read the pressure value on the gauge.
- 5 Calculate the brake force using the formula.

$$\text{Brake Force (Ton)} = \frac{P \times A \times R_A}{R_D}$$

Where:

- P = Pressure (Bar)
- A = Effective Area of Hydraulic Jack (cm²)
- R_A = Load Arm Radius (m)
- R_D = Drum Radius (m)

TYPICAL TEST SETUP

- 1 Install rope on drum and sheave.
- 2 Connect load arm to hydraulic jack.
- 3 Pump hydraulic pressure.
- 4 Read pressure on gauge.
- 5 Calculate brake force and evaluate.

SAFETY NOTES

- Ensure equipment is in good condition before use.
- Wear appropriate PPE during testing.
- Do not exceed the maximum rated pressure.
- Follow manufacturer's instructions.
